Value Proposition and Benefits of the WCIT 2014

- WCIT 2014 will provide an interdisciplinary, international platform, where local, regional and global business opportunities will be promoted.
- Mexico is an excellent high-level marketplace full of business opportunities with a population of 114 million and a \$1.2 trillion economy (14th largest economy in the world).
- Networking with qualified, potential customers, suppliers and partners will be provided through a first class B2B platform.
- Presence of key policy-makers and stakeholders from all over the world.
- World class conference program where relevant ICT topics will be discussed by highly influential and internationally known speakers.
- To foster the adoption and development of the information and communication technologies.
- To integrate new paradigms in public policy for entrepreneurs to innovate and generate more and new employment, new industry and careers.
- To position the high-tech industry of Mexico as a leader in the global IT market.
