

To Whom It May Concern,

We have the opportunity to work together with the Elevate Global team for the past 4 months. When we met them for first time we were impressed by their deep understanding of the AI and Machine learning and the solid team and expertise they have built so far.

Working and communicating with Gjorgji and Goran is very open and straight forward. They have a very structured approach when starting a new opportunity and invest a tremendous effort to understand the business context, the current challenges and what is the ultimate outcome of the business objective. This consultancy approach at the beginning enables smooth and open collaboration and makes the joint work very efficient. The Elevate Global team is ready to go the extra mile and set up clear and expectations as part of a successful business model.

We are extremely happy that in the scope of our pilot the team of Elevate Global managed to improve the performance of the solar and wind forecasting by 18 % over the course of the 2-month collaboration. In this way we managed to outperform the current performance of our client and be in a better position to convert the pilot into a monthly recurring revenue. During the pilot project Gjorgji and Goran were very proactive and were constantly seeking for improvement opportunities that will give a better result and help us succeed together.

The TokWise team is privilled to work with Elevate Global and rely on their expertise as an external consultant and partner in pursuing future business opportunities.

Sincerely,

Krasimir Kolev

Co-founder and Managing Partner
