**Subject:** RE: Few questions on TWITSA Global ICT Excellence Awards

Hi Dominykas,

We have compiled a few key pieces we think worth sharing with you:

[Higher utilization, less power consumption: energy efficiency in the data center](#) – Digital Daily

[How sustainable data centers can be](#) – KMU Magazine

[Equinix opens a new data center in Milan](#) – Data Manager

[Digital transformation will be essential in fighting climate change](#) – Tech Central

These are published in a few different markets, but let us know if you need anything else and if you have any other questions.

Have a great weekend!

Many thanks,  
Lottie
