

InterBrain

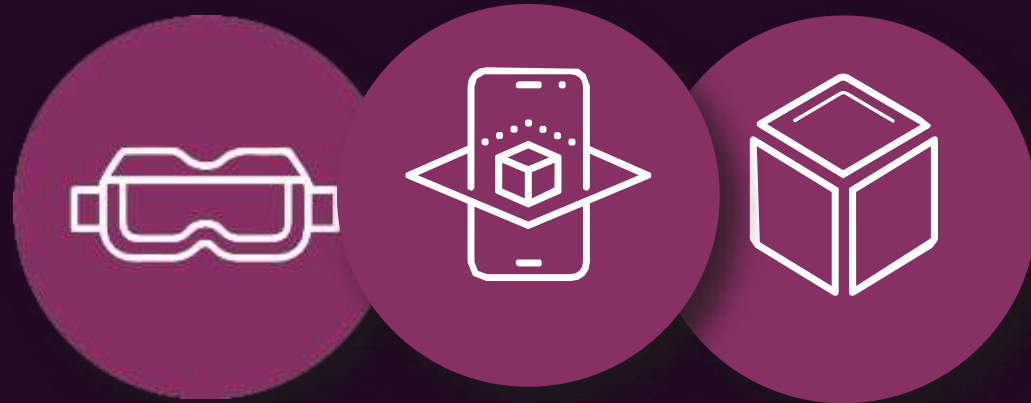

INNOVATION

We innovate in the way of learning, empowering work teams with our **Immersive Learning Technology**, therefore, improving organizational performance.

InterBrain is an **EdTech** that accelerates the learning processes of organizations through a **“Learning by Doing”** approach. We develop interactive, immersive and innovative resources that are powered by state of the art technology. These resources are deployed in our own Learning Content Management System Platform, which allows to drive organization's talent through Training Analytics.

« Solutions »

Training Simulators: Virtual Reality, Augmented Reality and 3D

We develop training simulators with cutting-edge technologies, achieving a unique immersive experience

Immersive Learning Platform

We created Interactive Academy, a native platform for the deployment of learning resources, integrating Simulators, Gamification and Training Analytics

Advice on Digital Transformation

We design the Learning Mapping Methodology, which allows us to guide the organization in its digital transformation path. Through learning we help the integration and evolution of work teams

Hardware Management

We guide, adapt and parameterize the hardware needed for the deployment of immersive training
